## INTRODUCTION

The Pathfinders has employed its experience in workforce assessments for corporate site-selection clients and civilian workforce assessments for the Department of Defense in locations that faced military base closures to produce this evaluation of the Flagler County workforce. The information presented in this report has been developed independently of the client, and the client has not influenced the findings.

The Pathfinders functions as a site-selection consultant to many of America's largest corporations, including companies such as AT&T, DuPont, Celanese, 3M Corporation, IMC Global, Singapore Aerospace, AIG, UPS, and Lockheed Martin. The question that most often drives the search for a new business location is whether the candidate location has the workforce needed, and a workforce analysis has been a key component of the site searches conducted for these clients. Senior human resources executives from among corporate clients assisted in refining this methodology and report format. Companies making location decisions based upon these surveys have reported that when staffing actually began, the numbers reported by The Pathfinders proved to be accurate.

In a poll of its corporate clients, The Pathfinders found that those clients' experiences suggest that less than 10% of the new hires for new operations come from the ranks of the unemployed. Instead, these clients and other companies staff a new operation principally with individuals who are working but who desire better jobs and who appear to possess the skills, education, and experience to qualify them for those better jobs. By that definition, those individuals can be considered "underemployed" and are identified as such in this report. The type of quality employer that Flagler County is attempting to attract will typically hire people who come from this group. As a consequence, The Pathfinders was retained to quantify the extent to which underemployment exists in the area, as well as to document the cost, skills, experience, and education of that hidden workforce. This report represents the objective and professional view of The Pathfinders with regard to workforce availability, cost, skills, and quality that a new employer can expect in Flagler County.

## SUMMARY OF FINDINGS

- Flagler County, referred to in this report as the “labor shed”, has a household population of approximately 75,900 and a civilian labor force of approximately 32,800.
- The labor shed has a pool of approximately 1,000 unemployed persons who are actively seeking work.
- A new employer will be able to attract employees from an additional pool of about 3,100 workers. These individuals are currently employed and have indicated an interest in changing jobs.
- These potentially available workers are referred to in this report as the “underemployed” because they appear to possess the skills, experience, and education to qualify them for the pay rates at which they would take a new job.
- The desired pay rates of these underemployed workers are reasonable when compared to their existing pay rates. The median current pay rate of the underemployed workers is \$15.25 per hour, and the median desired pay rate of the underemployed workers is \$15.99 per hour.
- About 25% of the underemployed workers would take a new job for \$12.55 per hour or less. At the upper end, the 25% most qualified and experienced will command more than \$25.00 per hour.
- Roughly 950 people, neither employed nor seeking work, might re-enter the workforce for the proper job.
- In total, Flagler County has 5,050 available workers for new or expanding businesses.

## METHODOLOGY

Published government statistics report wages and employment for the entire workforce of an area, even though most of that workforce has no interest in changing jobs. This report, prepared by The Pathfinders, includes data on those people in the area who desire to change jobs and who would be potential candidate workers for a new employer. As opposed to average wages, this report quantifies the number of those workers available for an employer in various wage ranges. Also included as potential workers are the unemployed who are actively seeking work and that segment of individuals who might consider re-entering the workforce for a good job.

A random sample of telephone numbers of qualified respondents in the labor shed was obtained for use in the Computer Assisted Telephone Interviewing or CATI system. The Pathfinders then conducted telephone interviews with individuals throughout Flagler County. Those individuals were proportionally stratified across age, household income, and zip codes. The purpose of these interviews was to ascertain availability for work with a new employer; determine desired pay rates; and, collect information on such factors as age, education, commuting patterns, experience, and skills. The data obtained as a result of those interviews enabled The Pathfinders to apply and employ a proprietary methodology that accurately determined the existence of underemployment as defined in the introduction.

The Pathfinders applied a proprietary process to the analysis of the data to correct for invalid responses. For example, those persons indicating they would take a new job but also indicating the desire for increased or decreased pay that is unreasonable are not counted in the results.

This process considers that to be counted as underemployed, an individual must be currently employed and willing to take another job at a pay rate commensurate with personal skills, education, and experience.

Current pay alone is not the qualifying factor for underemployment status in this study. Individuals, for example, making \$7.50 per hour, possessing no high school degree or skills, and being in the workforce for less than one year may consider themselves to be underemployed but are not considered to be so in this report. On the other hand, education, skills, and experience may qualify the person making \$22.00 per hour as truly underemployed.

Sufficient interviews were completed with qualified individuals to produce results for that entire population group which vary by no more than plus or minus 5 percentage points. If the survey were repeated 100 times, 95 times out of 100 the results would be the same as those resulting from a survey of every individual in the entire population.

Irrespective of the fact that the methodology employed is scientifically proven to produce such results, it is perhaps even more important to note that companies making location decisions based upon these surveys have reported that when staffing actually began, the numbers reported by The Pathfinders proved to be accurate.

## ASSESSMENT OF THE WORKFORCE

The Flagler County labor shed has a household population of approximately 75,900. The civilian labor force numbers approximately 32,800, and the labor shed contains approximately 1,000 unemployed people who are actively seeking work.

The results of this assessment determined that approximately 3,100 workers can be defined as underemployed: those individuals who are currently working but would take a better job if offered by a new or existing employer and who appear to possess the skills, education, and experience to qualify them to do so. Of these 3,100 underemployed workers, approximately 500 of them are currently working part-time and desire to change jobs and go to work full-time. Further, the results suggest that an additional 950 people who are not currently employed or actively seeking work would consider re-entering the workforce. In total, Flagler County has approximately 5,050 available workers for new or existing employers.

### AVAILABLE WORKERS

Number of underemployed workers	3,100
Number of unemployed persons who are actively seeking work	1,000
Number of persons who are not working, but would consider re-entering the workforce	950
<b>Total Number of Workers Available for Employers</b>	<b>5,050</b>

The reader is cautioned that, while the number of underemployed workers identified in the region, as well as their skills, experience, education, and costs, is accurate, all of those individuals may not be acceptable candidates for an employer. Their previous work records, stability, integrity, intelligence, appearance, and other factors are not considered in this report.

These underemployed workers might also be termed upgraders. They desire to move into an upgraded job and appear to possess the skills, education, and experience to enable them to do so. The pay rates they expect to achieve range from under \$8.00 to over \$30.00 per hour.

The following data represent the desired pay rates of the underemployed individuals in the labor shed. Many workers expressed their wage requirements in weekly, monthly, or annual terms, but all wage figures in this report are presented in hourly rates. Selected conversions may add perspective to the hourly rates. Figures presented below are rounded and based on a 40-hour workweek.

### CONVERSION CHART

Hourly	Weekly	Monthly	Annually
\$ 8.00	\$ 320.00	\$ 1,387.00	\$ 16,640.00
\$ 10.00	\$ 400.00	\$ 1,733.00	\$ 20,800.00
\$ 12.00	\$ 480.00	\$ 2,080.00	\$ 24,960.00
\$ 14.00	\$ 560.00	\$ 2,427.00	\$ 29,120.00
\$ 16.00	\$ 640.00	\$ 2,773.00	\$ 33,280.00
\$ 18.00	\$ 720.00	\$ 3,120.00	\$ 37,440.00
\$ 20.00	\$ 800.00	\$ 3,467.00	\$ 41,600.00
\$ 22.00	\$ 880.00	\$ 3,813.00	\$ 45,760.00
\$ 24.00	\$ 960.00	\$ 4,160.00	\$ 49,920.00
\$ 26.00	\$ 1,040.00	\$ 4,507.00	\$ 54,080.00
\$ 28.00	\$ 1,120.00	\$ 4,853.00	\$ 58,240.00
\$ 30.00	\$ 1,200.00	\$ 5,200.00	\$ 62,400.00

**DESIRED WAGE RATES PER HOUR BY RANGE**  
**3,100 Underemployed Workers**

**NUMBER OF UNDEREMPLOYED WORKERS AVAILABLE**  
**AT SPECIFIC WAGE RATES PER HOUR (rounded)**

<u>\$7.99 or Less</u> <b>50</b>	<u>\$8.00 - \$8.99</u> <b>200</b>	<u>\$9.00 - \$9.99</u> <b>100</b>	<u>\$10.00 - \$10.99</u> <b>100</b>	<u>\$11.00 - \$11.99</u> <b>50</b>
<u>\$12.00 - \$12.99</u> <b>500</b>	<u>\$13.00 - \$13.99</u> <b>50</b>	<u>\$14.00 - \$14.99</u> <b>200</b>	<u>\$15.00 - \$15.99</u> <b>300</b>	<u>\$16.00 - \$16.99</u> <b>50</b>
<u>\$17.00 - \$17.99</u> <b>100</b>	<u>\$18.00 - \$18.99</u> <b>50</b>	<u>\$19.00 - \$19.99</u> <b>100</b>	<u>\$20.00 - \$20.99</u> <b>200</b>	<u>\$21.00 - \$21.99</u> <b>25</b>
<u>\$22.00 - \$22.99</u> <b>100</b>	<u>\$23.00 - \$23.99</u> <b>50</b>	<u>\$24.00 - \$24.99</u> <b>100</b>	<u>\$25.00 - \$25.99</u> <b>100</b>	<u>\$26.00 - \$26.99</u> <b>100</b>
<u>\$27.00 - \$27.99</u> <b>25</b>	<u>\$28.00 - \$28.99</u> <b>25</b>	<u>\$29.00 - \$29.99</u> <b>50</b>	<u>\$30.00 - \$ 30.99</u> <b>50</b>	<u>\$31.00 or More</u> <b>425</b>

Utilizing the desired wage information as illustrated in the preceding charts, the following conclusions can be drawn concerning the underemployed workers in Flagler County:

- 10% of the underemployed workers will require \$9.60 per hour or less to change jobs.
- 25% of the underemployed workers will require \$12.55 per hour or less to change jobs.
- 50% of the underemployed workers will require \$15.99 per hour or less to change jobs.
- 75% of the underemployed workers will require \$24.99 per hour or less to change jobs.
- The upper 25% of the underemployed workers will require wages beginning at \$25.00 per hour and extending upward to over \$30.00 per hour. These are the most qualified and experienced workers.

**DESIRED WAGE RATES BY PERCENTILE**

**MEDIAN DESIRED PAY RATES BY SKILLS  
OF UNDEREMPLOYED WORKERS  
Flagler County Labor Shed**

Skills	Desired Pay
Office Operations	\$17.15
Warehouse/Materials Handling	\$15.23
Manufacturing/Assembly/Fabrication	\$15.90
Medical/Health Sciences	\$16.40
Maintenance/Installation/Repair	\$15.40
Technician/Quality Assurance	\$15.65
Information Technology	\$22.90
Electronics/Engineering	\$15.40
Telecommunications	\$19.90

## CHARACTERISTICS OF UNDEREMPLOYED WORKERS

### Flagler County Labor Shed

The following charts provide information on various characteristics of the underemployed workers in the labor shed. As these data relate solely to those individuals in the labor shed who are underemployed, they will vary from data representative of the population as a whole.

#### UNDEREMPLOYED WORKERS - GENDER

#### UNDEREMPLOYED WORKERS - AGE

## CHARACTERISTICS OF UNDEREMPLOYED WORKERS

### CURRENT COMMUTE DISTANCE

### CURRENT COMMUTE TIME

**CHARACTERISTICS OF UNDEREMPLOYED WORKERS**

**CURRENT SECTOR OF EMPLOYMENT**

\* The “Other” category of current employment for the underemployed workers in Flagler County includes those sectors with less than 5% representation. Those sectors are spread across a wide variety of categories, including, among others, information technology and utilities.

## **EXPERIENCE AND SKILLS – UNDEREMPLOYED WORKERS**

### **Flagler County Labor Shed**

The experience and skills categories used in this report are designed to provide accurate workforce data for employers which fall into one or more of the following four broad groups:

- manufacturing, assembly, fabrication or other industrial operations;
- back office, data processing, call centers, information technology, customer service or sales operations;
- distribution or transportation operations; and,
- biotechnology, pharmaceuticals or medical research operations.

The experience and skills categories are purposefully similar in order to present the most accurate worker availability for operations in one of those four groups.

An employee in the front office of a manufacturing operation will be considered to have “manufacturing” experience but may only have “office” skills. Someone with “manufacturing” experience may not have “manufacturing” skills, but could have “materials handling” skills if they work in shipping or receiving. “Sales and customer service” experience crosses many other experience and skills categories and ideally would be possessed by anyone with customer contact to any degree.

The similarities between the skills and experience categories are designed to ensure inclusiveness considering the multitude of tasks and job titles present in most business, government and institutional operations. Additionally, what may appear to some observers as redundancy is, in reality, a proven mechanism to cross-check the validity of responses and to identify the degree to which workplace and professional competencies are truly transferable to new positions and employers.

**EMPLOYMENT EXPERIENCE OF UNDEREMPLOYED WORKERS****Flagler County Labor Shed  
3,100 Underemployed Workers**

<b>Experience*</b>	<b>Number of Persons</b>	<b>Percentage</b>

\* Individuals polled may have skills in more than one job classification.

## UNEMPLOYED WORKERS

### Flagler County Labor Shed

This report documents two groups of unemployed individuals in the Flagler County labor shed who would be available workers for a new or expanding business. The groups are classified as:

- Individuals who are actively seeking work
- Individuals who are considering re-entering the workforce

Published statistics document 1,000 unemployed workers in the labor shed who are actively seeking work. Survey results indicate that 26% of these available workers were laid off from their jobs and 32% are unemployed due to company closures, relocations or job eliminations. Survey findings also indicate that 5% of the unemployed individuals who are actively seeking work are stay-at-home individuals and 16% are students. The remaining 21% are unemployed due to medical-related conditions or other reasons.

26% of these individuals have been unemployed, actively seeking work for less than one month; 53% for one to six months; 11% for seven to twelve months; and 10% of them have been actively seeking work for over two years.

This survey indicates that 32% of the unemployed, actively seeking work individuals are male. This group is one year older on average than the underemployed, and approximately 37% have two-year degrees or higher. The largest sector of recent employment for these available workers was construction. Their median most recent pay rate was \$12.40 per hour, and the median desired pay rate for these available workers is \$12.90 per hour.

In terms of skills and experience, these individuals who are actively seeking work are comparable to the underemployed in the areas of telecommunications and distribution.

Furthermore, the household survey results suggest that an additional 950 people, who are currently not employed or actively seeking work, would consider re-entering the workforce. About 75% of these additional individuals are female, and the group is three years older on average than the underemployed.

61% of these individuals have been unemployed for over twenty-four months, and the greatest percentage of these available workers are those people who are retired.

The education of this additional group roughly mirrors that of the underemployed members of the workforce, albeit with a somewhat higher concentration of “Some College, but No Degree”.

This group of potential available workers exhibits competitive measures of skills and experience in the following areas:

- manufacturing/assembly/fabrication
- information technology
- technician/quality assurance

The wages required by this group to enter or re-enter the workforce fall across a broad spectrum of pay rates, with \$12.39 per hour as the median. The lower quartile would take \$10.37 or less, and the upper quartile desires \$19.06 per hour or more.

The determinations for these two segments of the workforce have a larger statistical variance than that for the underemployed.

**FACTORS AFFECTING JOB DESIRABILITY  
FLAGLER COUNTY LABOR SHED  
5,050 TOTAL AVAILABLE WORKERS**

In an effort to identify those factors most important to Flagler County’s total available workers relative to consideration of an employer’s desirability, the surveyed individuals were asked to rate the following job factors on a scale of 1 to 5, with 5 being “extremely important” and 1 being “not important”. The table below presents the ratings for each factor. Please note this table is reflective of the 5,050 total available workers in Flagler County, which includes the underemployed, the unemployed actively seeking work and those considering re-entering the workforce.

<b>Factor</b>	<b>5 Extremely Important</b>	<b>4 Very Important</b>	<b>3 Important</b>	<b>2 Somewhat Important</b>	<b>1 Not Important</b>
Salary	47%	35%	14%	2%	2%
Location	34%	30%	25%	6%	5%
Insurance Benefits	58%	20%	13%	3%	6%
Retirement Benefits	46%	26%	16%	5%	7%
Paid Sick Leave & Holidays	44%	29%	21%	2%	4%
Physical Working Environment	27%	37%	26%	5%	5%
On-Site Child Care	10%	6%	12%	14%	58%
Paid Training Programs	30%	28%	28%	6%	8%
Flexible Work Schedule	32%	26%	25%	11%	6%
Opportunity for Advancement	46%	19%	21%	6%	8%
Financial Stability of the Company	56%	26%	14%	1%	3%
Reputation of the Company	45%	26%	21%	4%	4%
Size of the Company	8%	6%	40%	21%	25%

In the table below, the factors are presented in order by “extremely important”. Bear in mind that the scores should be viewed in relation to each other. In other words, respondents ranked opportunity for advancement as more “extremely important” as a job factor than paid training programs, although such a ranking does not mean that workers in Flagler County consider paid training programs to be unimportant in their evaluation of new job opportunities.

<b>Factor</b>	<b>Extremely Important</b>
Insurance Benefits	58%
Financial Stability of the Company	56%
Salary	47%
Opportunity for Advancement	46%
Retirement Benefits	46%
Reputation of the Company	45%
Paid Sick Leave & Holidays	44%
Location	34%
Flexible Work Schedule	32%
Paid Training Programs	30%
Physical Working Environment	27%
On-Site Child Care	10%
Size of the Company	8%

**INTEREST IN TRAINING COURSES  
FLAGLER COUNTY LABOR SHED  
5,050 TOTAL AVAILABLE WORKERS**

A component was added to this survey which was designed to determine possible interest in training courses on the part of the 5,050 available workers in the Flagler County workforce. The primary purpose of including this component was to produce data which would provide guidance in the establishment of training programs which will more precisely meet the needs of the public and the business community in Flagler County.

The extent to which interest is strong and those individuals might actually enroll in a training program is not known. That would obviously be influenced by scheduling, costs, length of the course and other factors. Perhaps the most dominant of those factors is the extent to which those individuals are aware of the course offering, its scheduling, cost and how and where to enroll.

However, this survey presents the relative interest in training courses of those workers in Flagler County who are available candidates for employment with a new or expanding business. The available workforce is comprised of three groups – the underemployed, the unemployed who are actively seeking work, and the unemployed who might consider re-entering the workforce.

In the table that follows, it should be noted that many of the respondents indicated interest in more than one program, therefore, the percent total will not equal 100.

**INTEREST IN TRAINING COURSES  
FLAGLER COUNTY LABOR SHED  
5,050 TOTAL AVAILABLE WORKERS**

Type of Training Course	Percentage
Computer Software Applications	49%
Human Resources	44%
Health Care	43%
Computer Programming	34%
Real Estate or Insurance	29%
Computer Maintenance or Repair	22%
Food Service or Hospitality	21%
Technical Trades	21%
Restaurant or Retail Management	21%
Industrial Machine Operations	14%
Construction Trades	14%
GED or Basic Reading, Writing, Arithmetic	12%
Auto or Maintenance Mechanics	11%
Cosmetology/Fashion or Interior Design	10%
ESL	9%

## EMPLOYERS' VIEWS OF THE THE FLAGLER/VOLUSIA COUNTY AREA TOTAL WORKFORCE

In developing a profile of existing workers in the Flagler/Volusia County region, The Pathfinders considered such factors as labor availability, productivity, unionization, attitudes, costs, and education. The analysis was based upon interviews conducted with senior management and human resources professionals from companies located in the labor shed. Each of these companies operated in the industrial, commercial, or service sectors. The interview sampling was sufficiently large to make valid workforce judgments.

As determined from the employer interviews, the table below reflects various methods used to recruit workers in the Flagler/Volusia County area and the percent of employers utilizing that method. Many use more than one method, therefore, the percentages will not add up to 100%.

Recruiting Method	% of Employers
Newspaper Ads	76%
Word of Mouth	48%
Internet	48%
Sign	19%
State Agency	14%
Staffing Service	10%
Referrals	10%
Job Fair	10%
Walk-Ins	5%

Employers with operations in other regions of the United States were asked to compare their experiences in those other areas with their experiences in the Flagler/Volusia County area. Of those employers who had operations elsewhere, all stated that their Flagler/Volusia County area operations were comparable to or better than the operations in other locations in terms of profitability and production. This is indicative not only of good management but also of a productive workforce.

Based upon the experience of The Pathfinders in evaluating labor forces in numerous locations, a definite correlation between productivity, absenteeism, tardiness, turnover, and substance abuse appears to exist. That correlation goes beyond the fact that an absent worker is obviously unproductive. Rather, those factors are indicative of an employee’s attitude toward the job. The chart below shows the percent of employers rating for turnover, tardiness and absenteeism in the Flagler/Volusia County region.

**PERCENT OF EMPLOYERS RATING  
THE FLAGLER/VOLUSIA COUNTY AREA TOTAL WORKFORCE**

Additionally, in the Flagler/Volusia County region, all of the employers interviewed stated their companies tested for substance abuse. Substance abuse within the individual companies’ workforces was reported as very low.

In consideration of all factors, 80% of the employers in the Flagler/Volusia County area rated the productivity of the workforce as “Good” to “Excellent”. Worker reliability received high marks from 70% of the employers.

**PERCENT OF EMPLOYERS RATING  
THE FLAGLER/VOLUSIA COUNTY AREA TOTAL WORKFORCE**

Category	Excellent	Good	Fair	Poor
Worker Productivity	5%	75%	20%	0%
Worker Reliability	5%	65%	25%	5%
Worker Attitudes	5%	60%	35%	0%

The educational competencies of employees are additional factors used to evaluate an area’s labor force. In the Flagler/Volusia County area, 39% of the employers interviewed rated the local public schools as “Excellent” or “Good”, and 74% of the employers rated the local community colleges and technical schools as “Excellent” or “Good”. Employers gave the following ratings to their employees relative to competency in reading, writing, and calculations.

**PERCENT OF EMPLOYERS RATING  
THE FLAGLER/VOLUSIA COUNTY AREA TOTAL WORKFORCE**

Category	Excellent	Good	Fair	Poor
Reading Competency	0%	58%	37%	5%
Writing Competency	0%	50%	33%	17%
Calculations Competency	0%	53%	32%	15%

A common employer complaint relates to the shortage of skilled and technical workers. The availability of these workers in the Flagler/Volusia County region must be viewed from the perspective of comparative availability when other areas of the state and nation are

considered. Skilled and technical workers are in great demand and difficult to find in the vast majority of locations. Of the companies in the labor shed interviewed, 10% considered skilled worker availability to be “Excellent” or “Good”, while 71% considered it to be “Fair”. The availability of technical workers in the labor shed was rated “Excellent” or “Good” by 12% of the interviewed companies and “Fair” by 47%.

The following table provides a composite portrait of employers’ experiences with and opinions of workers in the Flagler/Volusia County region. Taken in context with the data gathered and presented in the workforce survey, a balanced profile of the attributes of individuals available to fill the labor needs of new and expanding firms is provided.

**PERCENT OF EMPLOYERS RATING  
THE FLAGLER/VOLUSIA COUNTY AREA TOTAL WORKFORCE**

Category	Excellent	Good	Fair	Poor
Availability of Skilled Workers	5%	5%	71%	19%
Availability of Unskilled Workers	10%	75%	5%	10%
Availability of Professional Workers	0%	16%	63%	21%
Availability of Technical Workers	0%	12%	47%	41%

Worker Reliability	5%	65%	25%	5%
Worker Attitudes	5%	60%	35%	0%
Reading Competency	0%	58%	37%	5%
Writing Competency	0%	50%	33%	17%
Calculations Competency	0%	53%	32%	15%
Teamwork Skills	5%	70%	20%	5%
Entry Level Skills	5%	37%	53%	5%

**COMPARISONS OF EMPLOYERS RATINGS**  
**TOTAL WORKFORCE**  
**The Flagler/Volusia County Area Labor Shed /**  
**Locations Previously Surveyed**

In the course of workforce surveys, local employers are asked to rate their workers on a number of factors. Those factors include: worker productivity; worker reliability and attitudes; reading/writing/calculations competency; teamwork skills; entry level skills; availability of skilled workers; availability of unskilled workers; availability of technical workers; and, availability of professional workers. Local employers are asked to rate each factor either “Excellent”, “Good”, “Fair”, or “Poor”.

The purpose of these interviews and ratings is not only to determine how local employers rate their workers but also to provide a means for comparing local ratings to those of all locations surveyed during the past eighteen months. Such comparison will enable you to assess your employers’ ratings of their workers in contrast to the body of thousands of employer ratings recorded in that period.

The following charts present the comparative results for each factor. They compare the percentages of the Flagler/Volusia County area employers who rated their workers “Excellent”, “Good”, “Fair”, or “Poor” on each factor with the “Highest” rating of that factor in all areas surveyed in the last eighteen months and the “Median” rating for that factor in all areas surveyed during that time. As a result, the “Highest” and “Median” ratings do not add to 100%.

For example, 5% of the Flagler/Volusia County area employers rated “Worker Productivity” as “Excellent”. Of all the locations surveyed during the last eighteen months, the “Median” for that rating is 27%, and the “Highest” rating recorded in the “Excellent” category is 54%. The same comparison applies for each of the other factors. In these charts, the Flagler/Volusia County area is shown as “Labor Shed”.

## NATIONAL COMPARATIVE OBSERVATIONS

As a matter of course in site-selection projects, The Pathfinders evaluates published government workforce statistics. Those statistics, however, depict the entire workforce while only a minority segment of those workers will be considered for or have an interest in new jobs with a company. The characteristics of the select, underemployed workforce group represented in this report may vary significantly from the workforce as a whole as reported in published government data.

Accordingly, the information presented in the workforce report for Flagler County covers those members of the workforce who are, by virtue of their underemployment, potential candidates for new jobs. Existing employers, or new employers recruited to Flagler County, typically will not depend heavily on the unemployed to staff a new operation or to fill vacancies in existing operations caused by turnover or expansions. Companies look to the ranks of people who are already employed but are seeking to better themselves. Those individuals in that category who appear to possess the education, skills, and experience to merit a better job are classified as underemployed.

The workforce report issued by The Pathfinders documents the availability of underemployed workers as well as the skills, experience, education, and costs of individuals in that hidden workforce in Flagler County. This section of the report provides a comparison of the characteristics of the labor shed's underemployed workforce with the underemployed workforces in other communities previously surveyed throughout the nation. A prospect company considering Flagler County as a location will judge its workforce on a comparative basis. This section of the report will allow local economic development professionals to view the region's workforce in relation to others across the country. The comparative data for other locations used in the following charts and tables reflect information accumulated over the past eighteen months. The Pathfinders maintains a continuing database of over 600 surveyed counties and communities and more than 30 million workers.

## Locations Used In Comparative Analysis

In the various charts which follow this page, this labor shed is compared with others for the purpose of making the data meaningful. In the charts, figures for this labor shed are shown alongside the “lowest”, “median” and “highest” figures from other workforce surveys conducted by The Pathfinders. The comparisons are with communities and counties representing both larger and smaller and those similar in size to this labor shed. They are also scattered throughout the nation, and a partial listing of locations from which the “low”, “median” and “high” data reported are derived includes:

Albany, NY	Cullman County, AL	Lake Havasu, AZ	Rutherford County, TN
Albuquerque, NM	Culpeper County, VA	Laramie, WY	Salem, IL
Allegany County, MD	Danville, IL	LaSalle, IL	San Marcus, TX
Amarillo, TX	Daytona Beach, FL	Lea County, NM	Scranton, PA
Anderson, IN	Decatur, AL	Lebanon, KY	Sequin, TX

Chattanooga, TN	Independence, MO	Pensacola, FL	Vineland, NJ
Cheyenne, WY	Indianapolis, IN	Polk County, NC	Warren County, VA
Cleveland County, NC	Jackson, MS	Ponca City, OK	Watertown, SD
Clinton, SC	Jackson County, MO	Prescott Valley, AZ	Wilkes-Barre, PA
Conroe, TX	Jay County, IN	Reno, NV	Williamsport, PA
Corpus Christi, TX	Kalamazoo, MI	Rutherford County, NC	Yankton, SD

The workforce report documented the number of underemployed workers in the labor shed who would be available for an employer at various pay rates ranging from \$8.00 per hour or below to \$30.00 per hour or above and who appear to have the skills, experience, and education to justify the desired pay rates. The table below shows that 25% (lower quartile) of the underemployed workers in the labor shed would take a new job for \$12.55 per hour or less. In locations surveyed over the past eighteen months, the lowest desired pay rate in the lower quartile of underemployed workers was \$9.58 per hour or less, the median \$10.93 or less, and the highest desired pay rate was \$18.73 per hour or less.

**DESIRED WAGES (per hour) – LOWER QUARTILE  
UNDEREMPLOYED WORKERS**

<b>Desired Wage Labor Shed</b>	<b>Lowest Desired Wage Locations Surveyed Past 18 Months</b>	<b>Median Desired Wage Locations Surveyed Past 18 Months</b>	<b>Highest Desired Wage Locations Surveyed Past 18 Months</b>
\$12.55 or Less	\$9.58 or Less	\$10.93 or Less	\$18.73 or Less

Those underemployed workers in the upper quartile have more education, better skills, and greater experience. Yet based on current pay rates, they are considered to be underemployed. In the labor shed, the underemployed individuals in the upper 25% desire \$25.00 per hour or more. In locations surveyed over the past eighteen months, the lowest desired pay rate in the upper quartile of underemployed workers was \$16.91 or more, the median \$20.78 or more, and the highest was \$39.06 per hour or more.

**DESIRED WAGES (per hour) – UPPER QUARTILE  
UNDEREMPLOYED WORKERS**

<b>Desired Wage Labor Shed</b>	<b>Lowest Desired Wage Locations Surveyed Past 18 Months</b>	<b>Median Desired Wage Locations Surveyed Past 18 Months</b>	<b>Highest Desired Wage Locations Surveyed Past 18 Months</b>
\$25.00 or More	\$16.91 or More	\$20.78 or More	\$39.06 or More

The following charts compare the percentages of underemployed workers in Flagler County who have experience in various fields of employment with the percentages of underemployed workers in locations surveyed over the past eighteen months who have the same type of experience. In the charts, Flagler County is referred to as “labor shed”.

The experience charts are followed by skills charts, which compare the percentages of underemployed workers in Flagler County who possess various types of employment skills with the percentages of underemployed workers in locations surveyed over the past eighteen months who possess the same skills. In the charts, Flagler County is referred to as “labor shed”.

## CLOSING REMARKS

The foregoing report represents an assessment of the underemployment that exists in Flagler County. It includes a set of important interlocking measurements of the number of underemployed workers, their cost, skills, experience, education, reliability, productivity, and other related factors. The information allows the economic development professional and the site-selection team to view the area in comparison to other locations.

Attention should be given to the “Employers’ Views of the Flagler/Volusia County Area Total Workforce” section of this report in which local employers’ views of the characteristics of local workers are compared with employers’ views in other locations where the identical questions have been asked in identical fashion.

Similarly, attention should be given to the final section of this report, “National Comparative Observations”, which compares, employing an identical methodology, the costs, experience, and skills of local underemployed workers with those underemployed workers in locations surveyed by The Pathfinders over the past eighteen months.

While the number of underemployed workers in Flagler County, including their cost, skills, and experience, is the focus of this report, the data should be interpreted in a comparative perspective just as the corporate site selector will in deciding among competing locations.

**For Informational Purposes:**

<b>Flagler County Civilian Workforce.....</b>	<b>32,800</b>
<b>Largest Workforce Surveyed by The Pathfinders .....</b>	<b>3,452,000</b>
<b>Median Workforce Surveyed by The Pathfinders .....</b>	<b>138,400</b>
<b>Smallest Workforce Surveyed by The Pathfinders.....</b>	<b>3,350</b>
<b>Number of Locations Surveyed by The Pathfinders.....</b>	<b>298</b>

## SUPPLEMENTAL SECTION

This supplemental section of the report shows the skills and desired pay of the underemployed workers in Flagler County by their current experience.

As stated earlier, the experience and skills categories are purposefully similar in order to present the most accurate picture of worker availability. The similarities between the skills and experience categories are designed to ensure inclusiveness considering the multitude of tasks and job titles present in most business, government and institutional operations. Additionally, what may appear to some observers as redundancy is, in reality, a proven mechanism to cross-check the validity of responses and to identify the degree to which workplace and professional competencies are truly transferable to new positions and employers.

With respect to desired pay rates, there is no single, identifiable pattern in the amount of pay increase desired by workers who indicated a desire to change or upgrade their job status. Some would make a level move while some would accept less pay than their current rate. Most specified a reasonable pay increase, and those specifying unreasonable increases were eliminated from consideration.

The skills by current experience section provides data that suggest a reservoir of underutilized skills that may be tapped in order to satisfy the needs of expanding and new employers in a diversity of fields.
